This is a communication from the examiner in charge of your application. COMMISSIONER OF PATENTS AND TRADEMARKS		
*		
This application has been examined Responsive to communic	ation filed on	This action is made final.
A chortened statutory period for response to this action is set to expire	month(e),	days from the date of this letter.
Part I THE FOLLOWING ATTACHMENT(S) ARE PART OF THIS ACTIO	N:	
Notice of References Cited by Examiner, PTO-892.		raftsman's Patent Drawing Review, PTO-948.
3. Intermediate of Art Cited by Applicant, PTO-1449. 5. Information on How to Effect Drawing Changes, PTO-1474.		formal Patent Application, PTO-152.
Part II SUMMARY OF ACTION	« L	
1. 🔀 Cialms		are pending in the application.
Of the above, claims		
3. Claims		have been cancelled.  are allowed.
4. 🗵 Ctaims 1-10, 11-26		
		are objected to.
6. Claims	are subje	ct to restriction or election requirement.
7.  This application has been filed with informal drawings under 37 C.F.	R. 1.85 which are accepta	able for examination purposes.
6.  Formal drawings are required in response to this Office action.		
9. The corrected or substitute drawings have been received on are acceptable; not acceptable (see explanation or Notice of D	Oraftsman'e Patent Drawl	. Under 37 C.F.R. 1.84 these drawings ng Review, PTO-948).
10. The proposed additional or substitute sheet(e) of drawings, filed on examiner;  disapproved by the examiner (see explanation).	has (	have) been approved by the
11. The proposed drawing correction, filed, has	s been approved;	disapproved (see explanation).
12. Acknowledgement is made of the claim for priority under 35 U.S.C. 1  Deen filed in parent application, serial no	I 19. The certified copy ha	as 🗆 been received 🗆 not been received

Serial Number: 08/104125

Art Unit: 1108

Claims 1-10, 14-23, 25 and 26 are rejected under 35 U.S.C. § 112, first paragraph, as the disclosure is enabling only for claims limited compositions wherein the silicon oxide precursor is limited to that recited in claim 11. See M.P.E.P. §§ 706.03(n) and 706.03(z).

The discussion of the prior art at pages 1-4 of the specification teaches that a number of silicon oxide precursors are not useable for the purposes of the instant invention. One of ordinary skill in the art is given no further direction how to best choose those precursor that exhibit the required characteristics.

Claims 2-4, 18-24 and 26 are rejected under 35 U.S.C. § 112, fourth paragraph, as being of improper dependent form for failing to further limit the subject matter of a previous claim. Claims 1 and 25, the independent claims, are drawn to a composition. Limitations to the intended future use of that composition fail to further limit a claim to the composition itself.

Claims 11-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1 and 25 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. § 112.

Claims 2-10, 14-24 and 26 would be allowable if rewritten to overcome the rejection under 35 U.S.C. § 112 and to include all of the limitations of the base claim and any intervening claims.

Serial Number: 08/104125 -3-

Art Unit: 1108

The prior art of record fails to teach or suggest a gaseous composition comprising the recited tin oxide precursor, silicon oxide precursor and accelerant selected from borates, phosphites and water.

Any foreign language documents submitted by applicant have been considered to the extent the short explanation of significance, English abstract or English equivalent allow.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Brunsman whose telephone number is (703) 308-0662.
